

Marusugi's  
EAGLE Roof Tiles

Clay Roof Tile

# Eagle Maxim

Fusion of European tradition and Japanese technology  
New version of M-Type tile.

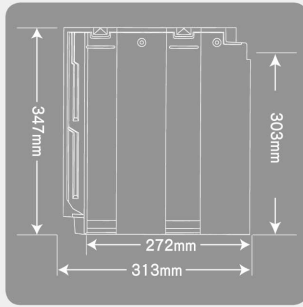

Available for 2.5/10 Pitched Roof

Roof Tile Color: Straight Black

## Technical Data

### Eagle Maxim

Length	347mm
Width	313mm
Exposed Length	303mm(298~303mm)
Exposed Width	272mm
Weight	2.9kg/piece(35.1kg/m <sup>2</sup> )
Pieces per Pallet	468pieces
Pieces per 1m <sup>2</sup>	12pieces
Minimum Roof Pitch	2.5/10

Note 1: The pitch of battens is 2mm-3mm longer than the exposed length of the tiles.

Note 2: You cannot install Eagle Maxim together with Eagle M nor Eagle M Disaster-Resistant. (They have different measurements.)

Feature 2

Renewal

## Lightweight

Eagle Maxim has become lighter by 10% than our former product!

This lightweight tiled roof protects the house while maintaining the high disaster resistance.

Heat resistant colored tiles reflect more than 50% of the infrared rays from sunlight to reduce heat.

See the back for the available colors.

Heat Resistant Color

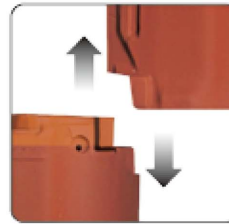

These double roman tiles create depth perspective for the roof.

Feature 1

## Disaster Resistant

### Interlock Feature

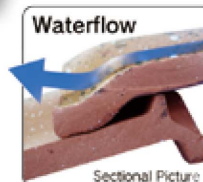

The locks on the upper-right corner and the bottom-left corner lock together to keep the roof tiles secure during a strong wind.

Feature 3

## Design

M-Type roof tile: distinctive traditional shape from Europe, strength, good workability and preventing rainwater from flowing underneath the roof tiles. The graceful curves and the wide range of colors give your roof depth and a wonderful expression.

\* The colors of the tiles might be slightly different from the actual products.

Roof Tile Color: Rusty Green

Heat resistant colored tiles reflect more than 50% of the infrared rays from sunlight to keep your house cool during summer.

## Eagle Maxim Colors

★-Heat Resistant Color

Straight Black

Light Brown

Silver Black

Rusty Green

※2 Sicilian Red

★ Burning Red

※1 ★ Clear Matte

★ Peach

★ Sand

※2 Chocolat

※1 There is a wood pattern on these colored tiles (this is from the glaze we use on them).

※2 We spray on these colored tiles during production, creating a random pattern on the surface. This is not a product defect.
